REPORT OF MANAGEMENT

Management of Investment and Trading of Real Estate Joint Stock Company (“the Company”) is pleased to present its report and the separate financial statements of the Company for the year ended 31 December 2011.

MANAGEMENT’S RESPONSIBILITY IN RESPECT OF THE SEPARATE FINANCIAL STATEMENTS

Management is responsible for the separate financial statements of each financial year which give a true and fair view of the separate state of affairs of the Company and of the separate results of its operations and its separate cash flows for the year. In preparing those separate financial statements, management is required to:

- ▶ select suitable accounting policies and then apply them consistently;
- ▶ make judgements and estimates that are reasonable and prudent;
- ▶ state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the separate financial statements; and
- ▶ prepare the separate financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue its business.

Management is responsible for ensuring that proper accounting records are kept which disclose, with reasonable accuracy at any time, the separate financial position of the Company and to ensure that the accounting records comply with the registered accounting system. It is also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Management has confirmed that it has complied with the above requirements in preparing the accompanying separate financial statements.

STATEMENT BY MANAGEMENT

Management does hereby state that, in its opinion, the accompanying separate financial statements give a true and fair view of the separate financial position of the Company as at 31 December 2011 and of the separate results of its operations and its separate cash flows for the year ended 31 December 2011 in accordance with the Vietnamese Accounting Standards and System and comply with relevant statutory requirements.

The Company is the parent company of a subsidiary listed in Note 12.1 of Notes to the separate financial statements and it is in the process of completing the consolidated financial statements of the Company and its subsidiary (collectively referred to as “the Group”) as at 31 December 2011 and for the year ended to meet the prevailing regulatory reporting requirements.

Users of these separate financial statements should read them together with the consolidated financial statements of the Group as at 31 December 2011 and for the year ended in order to obtain full information on the consolidated financial position, consolidated results of operations and consolidated cash flows of the Group as a whole.

For and on behalf of the management:

Truong Minh Thuan
General Director

INDEPENDENT AUDITORS' REPORT

To: The Shareholders of Investment and Trading of Real Estate Joint Stock Company

We have audited the separate financial statements of Investment and Trading of Real Estate Joint Stock Company ("the Company") as set out on pages 5 to 41 which comprise the separate balance sheet as at 31 December 2011, and the separate income statement and the separate cash flow statement for the year ended and the notes thereto.

The preparation and presentation of these separate financial statements are the responsibility of management. Our responsibility is to issue a report on these separate financial statements based on our audit.

Basis of opinion

We conducted our audit in accordance with Vietnamese Standards on Auditing. Those standards require that we plan and perform the review to obtain reasonable assurance about whether the separate financial statements are free from material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the separate financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the separate financial statements. We believe that our audit provides a reasonable basis for our opinion.

Opinion

In our opinion, the separate financial statements give a true and fair view of the separate financial position of the Company as at 31 December 2011, and of the separate results of its operations and its separate cash flows for the year ended 31 December 2011 in accordance with the Vietnamese Accounting Standards and System and comply with the relevant statutory requirements.

Without qualifying our opinion, we draw attention to Note 31 – Other matter to the separate financial statements. Under tax notice from the Department of Tax of Binh Chanh District, Ho Chi Minh City, the Company is required to pay additional land use fees of VND 244,550,400,000 due to change in application of land use fee frame. The Company's management, however, is of the opinion that the Company will not be subject to this application as the Company has paid the land use fees in accordance with the effective land regulations at the that time. The Company has been in the process of appealing the said application to the People's Committee of Ho Chi Minh City and Prime Minister. The ultimate outcome of the matter cannot presently be determined.

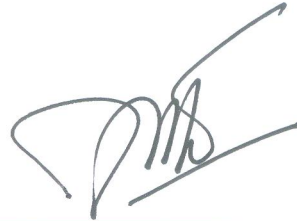

Without qualifying our opinion, we draw attention to Note 2.1 of the separate financial statements, which states that the Company is a parent company with a subsidiary and it is in the process of completing the consolidated financial statements of the Company and its subsidiary ("the Group") as at 31 December 2011 and for the year ended to meet the prevailing regulatory reporting requirements. Users of these separate financial statements should read them together with the consolidated financial statements of the Group as at 31 December 2011 and for the year ended in order to obtain full information on the consolidated financial position, consolidated results of operations and consolidated cash flows of the Group as a whole.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

3.1 Change in accounting policy and disclosures

The accounting policies adopted by the Company in preparation of the separate financial statements are consistent with those of previous years, except for the change in the accounting policy and disclosures in relation to Circular No. 210/2009/TT-BTC providing guidance for the adoption in Vietnam of the International Financial Reporting Standards on presentation and disclosures of financial instruments (“Circular 210”) issued by the Ministry of Finance on 6 November 2009 with effectiveness from financial years beginning on or after 1 January 2011.

The adoption of Circular 210 results in new disclosures being added to the separate financial statements as shown in Notes 29 and 30.

Circular 210 also requires the Company to evaluate the terms of non-derivative financial instruments issued by the Company to determine whether it contains both a liability and an equity component. Such components are classified separately as financial liabilities, financial assets or equity instruments in the separate balance sheet. This requirement has no material impact on the separate financial position or separate result of operation of the Company.

3.2 Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, cash at banks and short-term, highly liquid investments with an original maturity of less than three months that are readily convertible into known amounts of cash and that are subject to an insignificant risk of change in value.

3.3 Inventories

Inventory properties

Inventory properties, comprising mainly real estate properties, acquired or being constructed for sale in the ordinary course of business, rather than to be held for rental or capital appreciation, is held as inventory and is measured at the lower of cost and net realizable value.

Cost includes:

- Land use rights
- Construction and development costs
- Borrowing costs, planning and design costs, costs of site preparation, professional fees for legal services, property transfer taxes, construction overheads and other related costs

Non-refundable commissions paid to sales or marketing agents on the sale of real estate units are expensed when paid.

Net realizable value is the estimated selling price in the ordinary course of the business, based on market prices at the separate balance sheet date and discounted for the time value of money, if material, less costs to completion and the estimated costs of sale.

The cost of inventory recognized in profit or loss on disposal is determined with reference to the specific costs incurred on the property sold and an allocation of any non-specific costs based on the relative size of the property sold.

Other inventories

Inventories are stated at the lower of cost incurred in bringing each product to its present location and condition, and net realisable value. Net realisable value represents the estimated selling price in the ordinary course of business less the estimated costs to complete and the estimated costs necessary to make the sale.

The perpetual method is used to record inventories, which are valued as follows:

- | | |
|-----------------|---|
| Raw materials | - cost of purchase on a weighted average basis. |
| Work-in-process | - cost of direct materials and labour plus attributable manufacturing overheads based on the normal operating capacity. |

Provision for obsolete inventories

An inventory provision is created for the estimated loss arising due to the impairment (through diminution, damage, obsolescence, etc.) of raw materials, finished goods, and other inventories owned by the Company, based on appropriate evidence of impairment available at the separate balance sheet date.

Increases and decreases to the provision balance are recorded into the cost of goods sold account in the separate income statement.

3.4 Receivables

Receivables are presented in the separate financial statements at the carrying amounts due from customers and other debtors, along with the provision for doubtful debts.

The provision for doubtful debts represents amounts of outstanding receivables at the balance sheet date which are doubtful of being recovered. Increases and decreases to the provision balance are recorded as general and administration expense in the separate income statement.

as at and for the year ended 31 December 2011

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

3.5 *Fixed assets*

Tangible and intangible fixed assets are stated at cost less accumulated depreciation and amortisation.

The cost of a fixed asset comprises its purchase price and any directly attributable costs of bringing the fixed asset to working condition for its intended use. Expenditures for additions, improvements and renewals are capitalised and expenditures for maintenance and repairs are charged to the separate income statement as incurred. When fixed assets are sold or retired, their cost and accumulated depreciation or amortization are removed from the separate balance sheet and any gain or loss resulting from their disposal is included in the separate income statement.

3.6 *Depreciation and amortisation*

Depreciation of tangible fixed assets and amortisation of intangible assets are calculated on a straight-line basis over the estimated useful life of each asset as follows:

Buildings and structures	10 – 25 years
Machinery and equipment	2 – 10 years
Motor vehicles	5 – 10 years
Office equipment	3 – 5 years
Computer software	3 years

The useful life of the fixed assets and depreciation rates are reviewed periodically to ensure that the method and the year of the depreciation and amortisation are consistent with the expected pattern of economic benefits that will be derived from the use of fixed assets.

3.7 *Investment properties*

Investment properties are stated at cost including transaction costs less accumulated depreciation.

Subsequent expenditure relating to an investment property that has already been recognized is added to the net book value of the investment property when it is probable that future economic benefits, in excess of the originally assessed standard of performance of the existing investment property, will flow to the Company.

Depreciation of investment properties are calculated on a straight-line basis over the estimated useful life of each asset as follows:

Land use rights	25 – 50 years
Buildings	25 – 50 years

Investment properties are derecognised when either they have been disposed of or when the investment properties are permanently withdrawn from use and no future economic benefit is expected from its disposal. The difference between the net disposal proceeds and the carrying amount of the assets is recognised in the separate income statement.

Transfers are made to investment properties when, and only when, there is a change in use, evidenced by ending of owner-occupation, commencement of an operating lease to another party or ending of construction or development. Transfers are made from investment properties when, and only when, there is change in use, evidenced by commencement of owner-occupation or commencement of development with a view to sale.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

3.8 *Borrowing costs*

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

Borrowing costs are recorded as expense during the year in which they are incurred, except to the extent that they are capitalized as explained in the following paragraph.

Borrowing costs that are directly attributable to the acquisition, construction or production of an asset that necessarily take a substantial year of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset.

3.9 *Prepaid expenses*

Prepaid expenses are reported as short-term or long-term prepaid expenses on the separate balance sheet and amortised over the year for which the amounts are paid or the year in which economic benefits are generated in relation to these expenses.

3.10 *Investment in a subsidiary*

Investments in a subsidiary over which the Company has control are carried at cost. Distributions from accumulated net profits of the subsidiary arising subsequent to the date of acquisition are recognised in the separate income statement. Distributions from sources other than from such profits are considered a recovery of investment and are deducted to the cost of the investment.

3.11 *Investments in associates*

Investments in associates over which the Company has significant influence are accounted for under the cost method of accounting.

Distributions from the accumulated net profits of the associates arising subsequent to the date of acquisition by the Company are recognized as income in the separate income statement. Distributions from sources other than from such profits are considered a recovery of investment and are deducted to the cost of the investment.

Provision is made for any loss-making operations of the associates at the balance sheet date representing the excess of the acquisition cost over the collectible investment value at that date in accordance with the guidance under Circular No. 228/2009/TT-BTC issued by the Ministry of Finance on 7 December 2009. Increases and decreases to the provision balance are recorded as finance expense in the separate income statement.

3.12 *Investments in securities and other investments*

Investments in securities and other investments are stated at their acquisition costs. Provision is made for any diminution in value of the marketable investments at the balance sheet date representing the excess of the acquisition cost over the market value at that date in accordance with the guidance under Circular No. 228/2009/TT-BTC issued by the Ministry of Finance on 7 December 2009. Increases and decreases to the provision balance are recorded as finance expense in the separate income statement.

3.13 *Payables and accruals*

Payables and accruals are recognised for amounts to be paid in the future for goods and services received, whether or not billed to the Company.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS (continued)
as at and for the year ended 31 December 2011

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

3.14 *Provision for severance allowance*

The severance payment to employee is provided at the end of each reporting year for all employees who have more than 12 months in service up to 31 December 2008 at the rate of one-half of the average monthly salary of the last year up to the termination for each year of service in accordance with the Labour Code, Law on Social Insurance and related implementing guidance. Commencing 1 January 2009, the average monthly salary used in this calculation will be revised at the end of each reporting year following the average monthly salary of the 6-month period up to the balance sheet date.

Any changes to the accrued amount will be taken into the separate income statement. From 1 January 2009, the Company pays unemployment insurance in accordance with Decree No. 127/2008/ND-CP dated 12 December 2008.

3.15 *Provisions*

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

3.16 *Treasury shares*

Own equity instruments which are reacquired (treasury shares) are recognised at cost and deducted from equity. No gain or loss is recognised in profit or loss upon purchase, sale, issue or cancellation of the Company's own equity instruments.

3.17 *Appropriation of net profit*

Net profit after tax is available for appropriation to shareholders after approval in the shareholders' meeting, and after making appropriation to reserve funds in accordance with the Company's Charter and Vietnam's regulatory requirements.

The Company maintains the following reserve funds which are appropriated from the Company's net profit as proposed by the Board of Directors and subject to approval by shareholders at the annual general meeting.

Financial reserve fund

This fund is set aside to protect the Company's normal operations from business risks or losses, or to prepare for unforeseen losses or damages for objective reasons and force majeure, such as fire, economic and financial turmoil of the country or elsewhere.

Investment and development fund

This fund is set aside for use in the Company's expansion of its operation or in-depth investments.

Bonus and welfare fund

This fund is set aside for the purpose of pecuniary rewarding and encouragement, common benefits and improvement of the employees' material and spiritual benefits.

as at and for the year ended 31 December 2011

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

3.18 Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognised:

Construction contract

Where the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the amount of work completed and certified by customers at the balance sheet date. Variations in contract work, claims and incentive payments are included to the extent that they have been agreed with the customers. Where the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred that it is probable will be recoverable. Contract costs are recognised as expense in the year in which they are incurred.

Rental income

Rental income receivable under operating leases is recognized on a straight-line basis over the term of the lease, except for contingent rental income which is recognized when it arises.

Incentives for lessees to enter into lease agreements are spread evenly over the lease term, even if the payments are not made on such a basis. The lease term is the non-cancellable year of the lease together with any further term for which the tenant has the option to continue the lease, where, at the inception of the lease, the directors are reasonably certain that the tenant will exercise that option.

Premiums received to terminate leases are recognized in the separate income statement when they arise.

Sale of completed property

A property is regarded as sold when the significant risks and returns have been transferred to the buyer, which is normally on unconditional exchange of contracts. For conditional exchanges, sales are recognized only when all the significant conditions are satisfied.

Interest

Revenue is recognised as the interest accrues (taking into account the effective yield on the asset) unless collectability is in doubt.

Dividends

Income is recognised when the Company's entitlement as an investor to receive the dividend is established.

3.19 Taxation

Current income tax

Current income tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted as at the balance sheet date.

Current income tax is charged or credited to the separate income statement, except when it relates to items recognised directly to equity, in which case the deferred current income tax is also dealt with in equity.

Current income tax assets and liabilities are offset when there is a legally enforceable right for the Company to set off current tax assets against current tax liabilities and when the Company intends to settle its current tax assets and liabilities on a net basis.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS (continued)
as at and for the year ended 31 December 2011

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

3.19 *Taxation* (continued)

Deferred income tax

Deferred tax is provided using the balance sheet liability method on temporary differences at the separate balance sheet date between the tax base of assets and liabilities and their carrying amount for financial reporting purposes.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled based on tax rates and tax laws that have been enacted at the balance sheet date.

Deferred tax is charged or credited to the separate income statement, except when it relates to items recognised directly to equity, in which case the deferred tax is also dealt with in the equity account.

Deferred tax assets and liabilities are offset when there is a legally enforceable right for the Company to set off current tax assets against current tax liabilities and when they relate to income taxes levied on the same taxable entity by the same taxation authority.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised. Previously unrecognised deferred income tax assets are re-assessed at each balance sheet date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered.

3.20 *Financial instruments*

Initial recognition and presentation

Financial assets

Financial assets within the scope of Circular 210 are classified, for disclosures in the notes to the separate financial statements, as financial assets at fair value through profit or loss, held-to-maturity investments, loans and receivables or available-for-sale financial assets as appropriate. The Company determines the classification of its financial assets at initial recognition.

All financial assets are recognised initially at cost plus directly attributable transaction costs.

The Company's financial assets include cash and short-term deposits, trade and other receivables and unquoted financial instruments.

Financial liabilities

Financial liabilities within the scope of Circular 210 are classified, for disclosures in the notes to the separate financial statements, as financial liabilities at fair value through profit or loss or financial liabilities measured at amortised cost as appropriate. The Company determines the classification of its financial liabilities at initial recognition.

All financial liabilities are recognised initially at cost plus directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings.

Financial instruments – subsequent measurement

No subsequent measure of financial instruments is currently required.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the separate balance sheet if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

Included in Houses is the land use right at No. 20 Nguyen Binh Khiem street, Da Kao Ward, District 1 which was pledged to obtain short-term loan from Vietnam Bank for Agriculture and Rural Development (*Note 14*).

The fair value of the investment properties had not yet been formally assessed and determined as at 31 December 2011. However, given the prevailing condition of the real estate sector in Vietnam, it is management's assessment that these properties' market values are still higher than their carrying value as at balance sheet date.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS (continued)
as at and for the year ended 31 December 2011

26. CORPORATE INCOME TAX

The Company has the obligation to pay corporate income tax ("CIT") at the rate of 25% of taxable profits.

The Company's tax returns are subject to examination by the tax authorities. Because the application of tax laws and regulations to many types of transactions is susceptible to varying interpretations, the amounts reported in the separate financial statements could change at a later date upon final determination by the tax authorities.

26.1 Current CIT

The current tax payable is based on taxable profit for the year. The (tax loss) taxable profit of the Company for the year differs from the (loss) profit as reported in the separate income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are not taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted at balance sheet date.

A reconciliation between the accounting (loss) profit before tax and estimated current (tax loss) taxable profit is presented below:

	VND	
	Current year	Previous year

as at and for the year ended 31 December 2011

29. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company's principal financial liabilities are loans and borrowings and trade and other payables. The main purpose of these financial liabilities is to finance the acquisition and development of the Company's property portfolio. The Company has loan receivable, trade and other receivables, trade and other payable and cash and short-term deposits that arise directly from its operations. The Company does not hold or issue any derivative financial instruments.

The Company is exposed to market risk, real estate risk, credit risk and liquidity risk.

Risk management is integral to the whole business of the Company. The Company has a system of controls in place to create an acceptable balance between the cost of risks occurring and the cost of managing the risks. The management continually monitors the Company's risk management process to ensure that an appropriate balance between risk and control is achieved.

Management reviews and agrees policies for managing each of these risks which are summarized below.

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise four types of risk: interest rate risk, currency risk, commodity price risk and other price risk, such as equity price risk. Financial instruments affected by market risk include loans and borrowings and deposits and unquoted financial instruments.

The sensitivity analyses in the following sections relate to the position as at 31 December 2011 and 31 December 2010.

The sensitivity analyses have been prepared on the basis that the amount of net debt, the ratio of fixed to floating interest rates of the debt are all constant.

In calculating the sensitivity analyses, management assumed that:

- ▶ the sensitivity of the balance sheet relates to available-for-sale debt instrument;
- ▶ the sensitivity of the relevant income statement item is the effect of the assumed changes in respective market risks. This is based on the financial assets and financial liabilities held at 31 December 2011 and 31 December 2010.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to market risk for changes in interest rate relates primarily to the Company's long-term debt obligations with floating interest rates.

The Company manages interest rate risk by looking at the competitive structure of the market to obtain rates which are favorable for its purposes within its risk management limits.

Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings.

29. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (continued)

Market risk (continued)

Interest rate sensitivity (continued)

With all other variables held constant, the Company's profit before tax and balance sheet are affected through the impact on floating rate borrowings as follows:

			VND
	<i>Increase/decrease in basis points</i>	<i>Effect on profit before tax</i>	<i>Effect on balance sheet items</i>
For the year ended 31 December 2011			
VND	+200	(4,240,342,158)	3,705,260,000
VND	-200	4,240,342,158	(3,705,260,000)
For the year ended 31 December 2010			
VND	+300	(2,945,615,096)	5,905,260,000
VND	-300	2,945,615,096	(5,905,260,000)

Real estate risk

The Company has identified the following risks associated with the real estate portfolio: (i) the cost of the development schemes may increase if there are delays in the planning process. The Company uses advisers who are experts in the specific planning requirements in the scheme's location in order to reduce the risks that may arise in the planning process; (ii) the exposure of the fair values of the portfolio to market and occupier fundamentals.

Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily for trade receivables) and from its financing activities (primarily for deposit with banks).

Credit risks related to receivables resulting from the sale of inventory property

Customer credit risk is managed by requiring customers to pay advances before transfer of ownership, therefore, substantially eliminating the Company's credit risk in this respect.

Bank deposits

The Company's bank balances are mainly maintained with well-known banks in Vietnam. Credit risk from balances with banks is managed in accordance with the Company's policy. The Company's maximum exposure to credit risk for the components of the balance sheet at each reporting dates are the carrying amounts as illustrated in Note 4. The Company evaluate the concentration of credit risk in respect to bank deposit as low.

as at and for the year ended 31 December 2011

29. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (continued)

Liquidity risk

The liquidity risk is the risk that the Company will encounter difficulty in meeting financial obligation due to shortage of funds. The Company's exposure to liquidity risk arises primarily from mismatches of maturities of financial assets and liabilities.

The Company monitors its liquidity by maintain a level of cash and cash equivalents and bank loans deemed adequate by management to finance the Company's operations and to mitigate the effects of fluctuations in cash flows.

The table below summarizes the maturity profile of the Company's financial liabilities based on contractual undiscounted payments:

	VND			
	<i>On demand</i>	<i>Less than 1 year and from 1 to 5 years</i>	<i>More than 5 years</i>	<i>Total</i>

	-	229,351,700,365	185,263,000,000	414,614,700,365

The Company assessed the concentration of risk with respect to refinancing its debt and concluded it to be low. Access to sources of funding is sufficiently available and debt maturing within 12 months can be rolled over with existing lenders.

Collateral

The Company has pledged its land use right of projects in order to fulfil the collateral requirements for the short-term loan obtained from Bank for Investment and Development of Vietnam, Vietnam Bank Agriculture and Rural Development, Saigon Trading Group and Gia Dinh Development Investment Corporation (*Note 14*), and long-term loan obtained from Saigon Commercial Joint Stock Bank, District 4 Branch (*Note 20*). The Bank has an obligation to return the land use right to the Company. There are no other significant terms and conditions associated with the use of collateral.

The Company did not hold collateral at 31 December 2011 and 31 December 2010.

The fair value of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The following method and assumption were used to estimate the fair values:

- Cash and short-term deposits, trade receivables, trade payables and other current liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.
- The fair value of loans from banks as well as other non-current financial liabilities is estimated by discounting future cash flows using rates currently available for debt on similar terms, credit risk and remaining maturities. As at 31 December 2011, the carrying amounts such borrowings are not material different from their calculated value.

31. OTHER MATTERS

In 2004 and 2005, the Company compensated and developed these residential real estate projects under the approval of the Board Management of the Saigon South and the People's Committee of Ho Chi Minh City. These lands were sold to its customers and the related land use fees of these projects was paid to the relevant authorities based on the tax notices from the Department of Tax of Binh Chanh District, Ho Chi Minh City ("DoT") and in accordance with applicable land regulations in the years 2004 and 2005.

However, the Company has received the additional tax notice from DoT, requesting the Company to pay additional land use fee of VND 244,550,400,000 for these projects due to change in application of land use fee frame. The Company's management is of the opinion that the Company will not be subject to the additional land use fee as the Company has paid the land use fee in accordance with applicable land regulations at that time. The Company's management further believes the application of land use fee frames above breached the principle of objectivity and fairness in regulations which, in this case, adversely impacts the financial well being of the Company.

In June 2011, the Government Inspectors performed an inspection in the compliance with applicable regulations on land use and construction planning and land management of Ho Chi Minh City for the period from 2001 to 2010, including land lot No.7 – 6B project and 13E project ("these projects") of the Company in accordance with the Decision No. 404/QĐ-TTCP dated 8 March 2011 of the Government Inspectorate of Vietnam.

Under the Minutes dated 30 June 2011 between the Government Inspectors and the Company, the Government Inspectors commented the land use and management of these projects of the Company as follows:

- Land compensation: up to 31 December 2005, the Company has completed its land compensation process. In accordance with Decree No. 120/2010/ND-CP dated 30 December 2010 of the Government, Official Letter No. 7694/UB-DT dated 14 December 2004 of the People's Committee of Ho Chi Minh City and Official Letter No. 678/PC-BQL dated 27 December 2004 of the Management Board of Saigon South, the Company is entitled to the land use fee frame for the compensated land areas in the years 2004 and 2005 based on areas actual handed-over land.
- Project locations: the locations applied for land use fee computation by the DoT were not in conformity with the inter-departmental official letter No. 41/HD-LS dated 21 January 1995 and No. 734/HD-LS dated 31 January 2005, and also were not applied Decision No. 21/2002/QĐ-UB dated 11 March 2002 of People's Committee of Ho Chi Minh City in the determination of the location of these projects.

As of the date of this report, the Company has been in the process of appealing this application to the People's Committee of Ho Chi Minh City and Prime Minister Accordingly, the ultimate outcome of the matter cannot presently be determined and no provision for any liability that may result has been made in the separate financial statements.

32. EVENTS AFTER THE BALANCE SHEET DATE

There have been no significant events occurring after the balance sheet date which would require adjustments or disclosures to be made in the separate financial statements.
